December 10, 2010

Tim,

I wanted to send you a note to thank you for your suggestion to resurface our road with reconstituted asphalt. Since it retains considerable heat, it has already saved on the amount of snow plowing. This is just another example of the reason why I continue to consult and work with you on our construction and infrastructure projects. It has been our pleasure to work with you on the tree removal, road expansion, and road resurfacing (approximately $\frac{3}{4}$'s of a mile) projects that have always been done timely and on budget. I have always found that "ideal working relationships" occur when the work is done well and with integrity. Then that relationship develops into a strong friendship. I can strongly recommend Tim Delong and the work he does.

Thanks again,

Glenn E McCoy

Grand County, Colorado
